Steigtind is an excellent mid-layer jacket that takes up little space. The jacket is padded with Thinsulate lining. This padding provides very high insulation even with thin layers. The jacket has panels on the sides and under the arms made of elastic material. This makes it very comfortable and flexible to wear, even under shell clothing. The jacket has a good hood, two zippered pockets at the hips, and an inner zippered pocket. The outer fabric of the jacket has a waterproof and breathable coating.

Technical description: Outer fabric: 100% Nylon, Inner fabric: 100% Polyester, Lining: 100% Polyester.
