Akita Professional is made from a comfortable 4-way stretch fabric that provides full mobility. The pants have a relaxed fit with relatively narrow legs and an extended back section with elastication. The waistband features elastic, internal adjustment options and belt loops, with two loops—one on each side—that can also serve as hammer holders. The pants have ample pockets at the front and back, with the hanging pockets being removable. These are secured with sturdy zippers and snap buttons to withstand the weight of tools, screws, and nails. Several pockets are reinforced on the inside for durability. Reinforced areas at the knees also serve as pockets for kneepads. The hi-vis material at the ankles is made of a durable fabric to withstand wear. Two 7cm-wide zebra reflective strips are placed around the ankles. A solid and comfortable pair of pants designed to meet the challenges of a busy workday.

Technical description: HiVis cl.1, Body: 90% Polyester, 10% Elastane, Leg: 80% Polyester, 20% Cotton, Knee/bottom: 100% Nylon, CE, EN ISO 20471:2013+A1:2016, EN ISO 13688:2013+A1:2021.

Close zippers and buttons before washing the garment in the machine at 30 degrees. Do not iron, tumble dry, dry clean, or bleach. The effect of the reflective stripes gets reduced after multiple washes. Avoid using fabric softener.
