The Force Wool Technical sock is designed with those who spend a lot of time outdoors in mind, whether working in the open air or enjoying a long hike in nature. With an ideal blend of 60% wool and durable synthetic materials, the sock offers warmth and comfort throughout the day. This combination provides a temperature-regulating effect while ensuring an optimal fit and breathability.

The sock has a mid-height design, ideal for use with high-cuffed shoes. Seamlessly knitted with reinforcement at the toe and heel, combined with extra elastic over the instep, it ensures a good fit on the foot. Such a knitting method, along with the quality selected, minimizes the risk of blisters and will keep your feet dry and warm. It is an ideal sock for most days and can also be used as a liner sock when extra warmth is needed.

The sock is knitted with a stitch size of 21 microns, which provides excellent durability and elasticity, while also offering great support. Our wool is RWS-certified, the material is Oeko-Tex certified, and mulesing-free, ensuring a sustainable product choice.

Technical description: 60% Wool, 28% Polyamid, 10% Viscose, 2 % Elastane.

Machine wash at 60 degrees on a wool cycle. Use a detergent specifically formulated for wool and silk. Do not iron, bleach or dry clean. Tumble dry (Low temperature).
