Mountain tarp with lining and integrated belt, including a storage pouch with an integrated repair kit.

Areas of Use

- 1.1 Stretcher
- 1.2 Poncho
- 1.3 Tarp / Lean-to Shelter
- 1.4 Sleeping bag / Wind Sack
- 1.5 Cocoon

Materials

Outer material	100% Polyester with white coating
Weaving technique	Ripstop
Lining	100% Polyester, heat reflecting silver coating
Fill	3M™ Thinsulate™ 60 gsm/m ²
Length	220 cm
Width	101 cm (202 cm unfolded)
Weight	1,86 kg incl. storage pouch (3 straps)
Zippers	SBS (YKK)
WP	10.000 mm (8000 mm after one wash)
MVP	14 506 g/m ² /24h

1.2 Stretcher

The carrying system is designed for quick and easy evacuation of injured individuals.

- 8 carrying straps for transportation
- Comfortably carried by 4 - 8 persons
- Strategic openings for head and arms with closure systems
- Possibility for "banak-packing"

1.2 Poncho

The tarp features a hood, and when combined with the accompanying belt, it can be adjusted individually and used as a poncho.

- Adjustment options on the hood
- Elastic belt included

1.3 Tarp / Lean-to Shelter

The unfolded tarp can be set up as a tarp/lean-to shelter by using the metal rings as attachment points for suspension.

- There is the possibility to attach multiple tarps together with zippers both in width and length, depending on the need.
- The zippers are equipped with protective flaps to ensure they remain waterproof.

1.4 Wind Sack

When folded, the tarp functions as a wind sack.

- Strategically placed openings for the face and arms with access to zippers from the inside.
- The armholes can be used for ventilation.

1.5 Cocoon

The folded tarp can be suspended between trees using the metal rings as attachment points.

- Access to zippers from the inside.
- Suspension that allows entry from both the long and short sides.
- Openings can be used for ventilation.
